Background

The Virginia Department of Health (VDH) receives data on visits to 82 acute care hospital emergency departments (EDs) and 13 free-standing EDs in Virginia for purposes of public health surveillance. The purpose of this report is to characterize ED visit trends for acute unintentional overdose by opioids and heroin among Virginia residents.

Chief complaints and discharge diagnoses of ED visits are analyzed by VDH to identify and monitor issues of public health concern across Virginia. The chief complaint is a free-text field that captures the patient's primary reason for seeking medical care as interpreted by the ED registration staff. The discharge diagnosis is a coded field that uses standardized values outlined by the International Classification of Diseases (ICD) 9th and 10th Revision code sets.

Methodology

ED visits that are identified as **unintentional overdose by opioid or unspecified substance** include those with medical and non-medical use of a prescription opioid or where the substance is not specified, given evidence that the majority of fatal overdoses are opioid-related.¹ These visits must meet the following inclusion and exclusion criteria:

- Inclusion terms from Chief Complaint or Discharge Diagnosis: *overdose, OD, sobredosis, opioid, opiate, opium, narcotic, Narcan, naloxone, E850.1, E850.2, 965.00, 965.02, 965.09, 977.9, T40.0X1, T40.0X4, T40.2X1, T40.2X4, T40.3X1, T40.3X4, T40.4X1, T40.4X4, T40.601, T40.604, T40.691, T40.694, T50.901, T50.904*
- Exclusions terms from Chief Complaint or Discharge Diagnosis: *suicide, alcohol overdose alone, withdrawal, detoxification, rehab, addiction, dependency, mental health or psychological evaluation, allergies, constipation, chronic pain, refill requests, and any specified non-opioid drug or medication*

ED visits that are identified as **unintentional overdose by heroin** must meet the following inclusion and exclusion criteria:

- Inclusion terms from Chief Complaint or Discharge Diagnosis: *heroin, herion, 965.01, E850.0, T40.1X1A, T40.1X4A*
- Exclusions terms from Chief Complaint or Discharge Diagnosis: *suicide, withdrawal, detoxification, rehab, and addiction*

These criteria were revised in September 2016 in order to improve specificity in the identification of ED visits for unintentional drug overdose. Readers are strongly encouraged to review [syndromic surveillance data limitations](#) when interpreting this report.

ED visits for unintentional overdose by opioid or unspecified substance and heroin are presented by count or rate per 100,000 population. Rates are calculated using U.S. Census Bureau 2015 population estimates. To protect confidentiality and maintain accurate rate calculations, ED visit counts of 1 to 4 and rates with numerators of 1 to 4 are suppressed in this report. Counts of 0 are included.

The geographic location is assigned based on the patient's residential zip code provided. A single zip code may span multiple city and county localities in Virginia. If a patient resides in such a zip code, the visit is assigned to the locality where the majority of the population resides. Places where the Virginia city and county populations have been combined to calculate a rate per 100,000 population due to zip codes spanning multiple localities can be found in [Appendix 1](#).

Highlights for December 2016

Statewide ED visits for overdose by opioid or unspecified substance among Virginia residents decreased by 1 visit (<1%) in December compared to November 2016.

- Among the 5 [VDH health planning regions](#), visits for overdose by opioid or unspecified substance increased in the Eastern (11 visits, 6%) and Southwest (2 visits, 1%) regions while decreasing in Central and Northwest regions. Northern region observed no change.
- By sex, visits for overdose by opioid or unspecified substance increased among males by 33 additional visits (10%) and decreased among females by 34 visits (9%). This is the first time since January 2015 - when this information started being recorded - that the number of visits among males surpassed females. The rate of visits per 100,000 population among males has surpassed females more often, last happening in August 2016.
- By age group, visits for overdose by opioid or unspecified substance increased among those aged 25-34, 35-44, 55-64, and 65 years and older. The greatest increase was observed among the 35-44 age group with 23 additional visits (23%).
- Among the 35 [VDH health districts](#), the largest increases in visits for overdose by opioid or unspecified substance were observed in Alexandria (100%), Crater (71%), and Portsmouth (58%). The VDH health district with the highest visit rate per 100,000 population, however, was Roanoke for the fourth consecutive month.

Statewide ED visits for overdose by heroin among Virginia residents decreased by 3 visits (3%) in December compared to November 2016.

- Among the 5 [VDH health planning regions](#), visits for overdose by heroin increased in the Eastern (9 visits, 32%) and Southwest (1 visit, 17%) regions. Visits in the Central, Northern, and Northwest Regions decreased.
- By sex, visits for overdose by heroin decrease among both females and males by 3% with 1 and 2 fewer visits, respectively.
- By age group, visits for overdose by heroin increased among those aged 15-24 years with 6 additional visits (25%) while decreasing in all other age groups. The largest proportion of visits, however, remained among those aged 25-34 years representing 42% of visits over the previous 12 months as well as the highest visit rate per 100,000 population.
- Among the 35 [VDH health districts](#), the most notable increases in visits for overdose by heroin were observed in Chesterfield (133%), Hampton (100%), and Rappahannock (71%). The VDH health district with the highest visit rate per 100,000 population, however, was Rappahannock-Rapidan for the fourth consecutive month.

Appendix 1

Virginia Localities that were Combined for the Purposes of Calculating Rate per 100,000 Population

- Alleghany County and Covington City
- Albemarle County and Charlottesville City
- Augusta County, Staunton City, and Waynesboro City
- Chesterfield County and Colonial Heights City
- Frederick County and Winchester City
- Fairfax County, Fairfax City, and Falls Church City
- Grayson County and Galax City
- Greenville County and Emporia City
- Henry County and Martinsville City
- Montgomery County and Radford City
- Pittsylvania County and Danville City
- Prince George County, Hopewell City, and Petersburg City
- Prince William County, Manassas City, and Manassas Park City
- Roanoke County, Roanoke City, and Salem City
- Rockingham County and Harrisonburg City
- Rockbridge County, Buena Vista City, and Lexington City
- Southampton County and Franklin City
- Washington County and Bristol City
- Wise County and Norton City
